Tecnologias emergentes aplicadas às redes

Rafaela Werlang

25/05/2022

Technology continuously evolving to address network provider challenges / requirements

Network Provider Requirements

Scale

Reduction in \$/bit and W per km

Operational Simplification

Improved Service Agility

Ability to innovate

Technology Evolution and Network Transformation Opportunities

NMS

Centralized, Multi-layer Domain Controller
Centralized Path Computation Engine, Multi-vendor support

SDN

Router

Monolithic, proprietary chassis-based (5-20RU)

Energy-efficient chipsets, purpose built for NG IP applications (1-2RU)

NETCONF
YANG

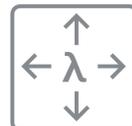

Disaggregated HW/SW

Converged Transport

Disaggregation

100G → 800G

Real-time Visibility / Insight

C&L

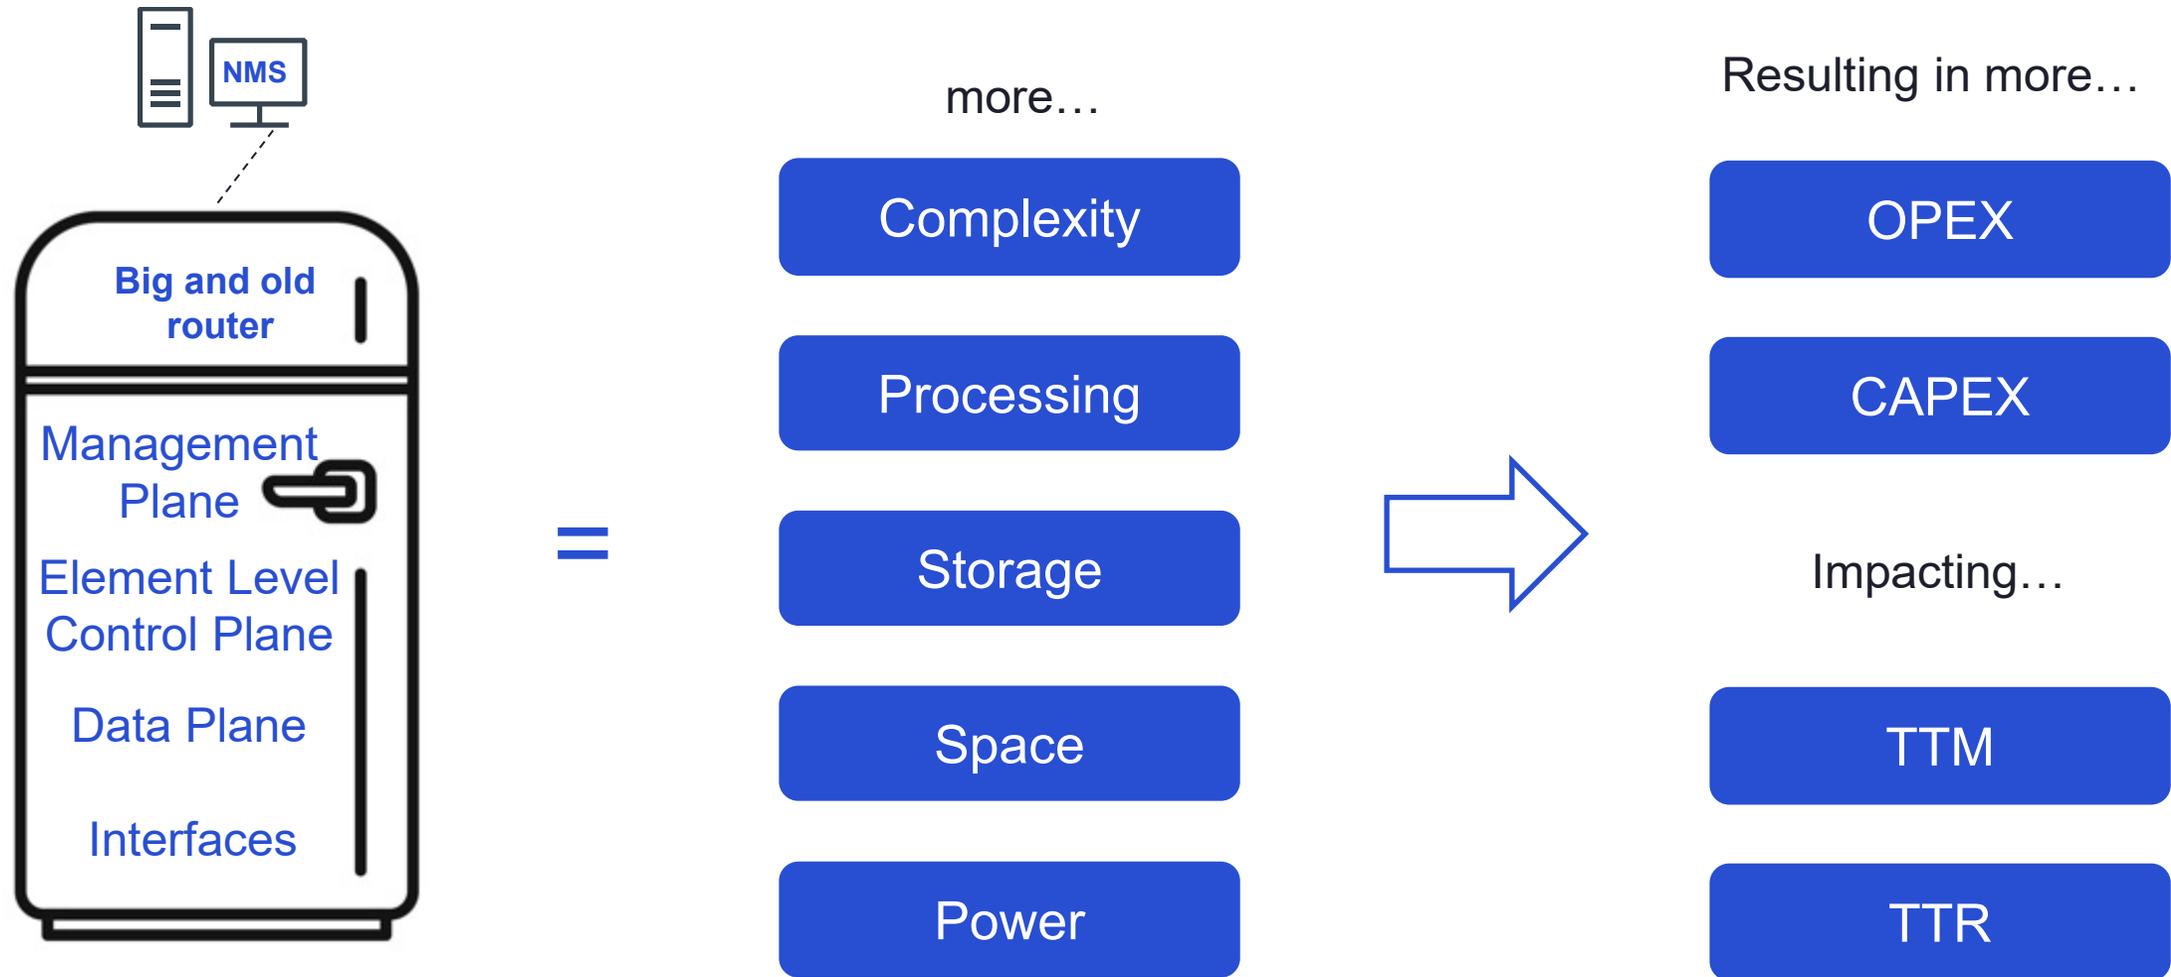

gRPC

Automation

Legacy IP approach will not support the new applications

There is a Better Way to Evolve IP-based Networks

Ciena's Adaptive IP™

Capable of scaling clients and resources on-demand

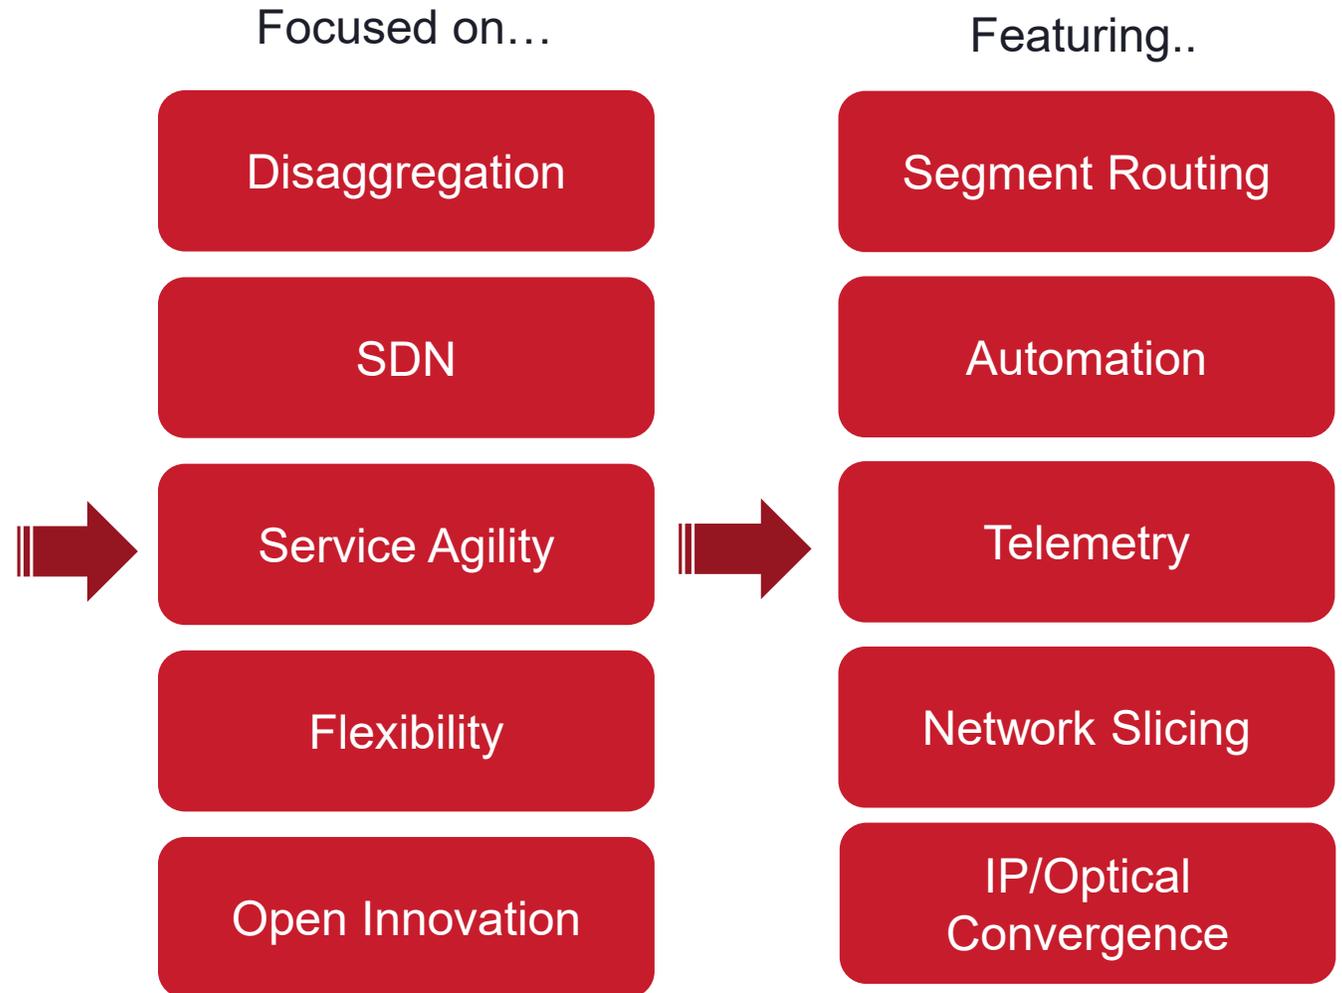

Fluid in topology and architecture

Software-centric

Disaggregated control and data planes

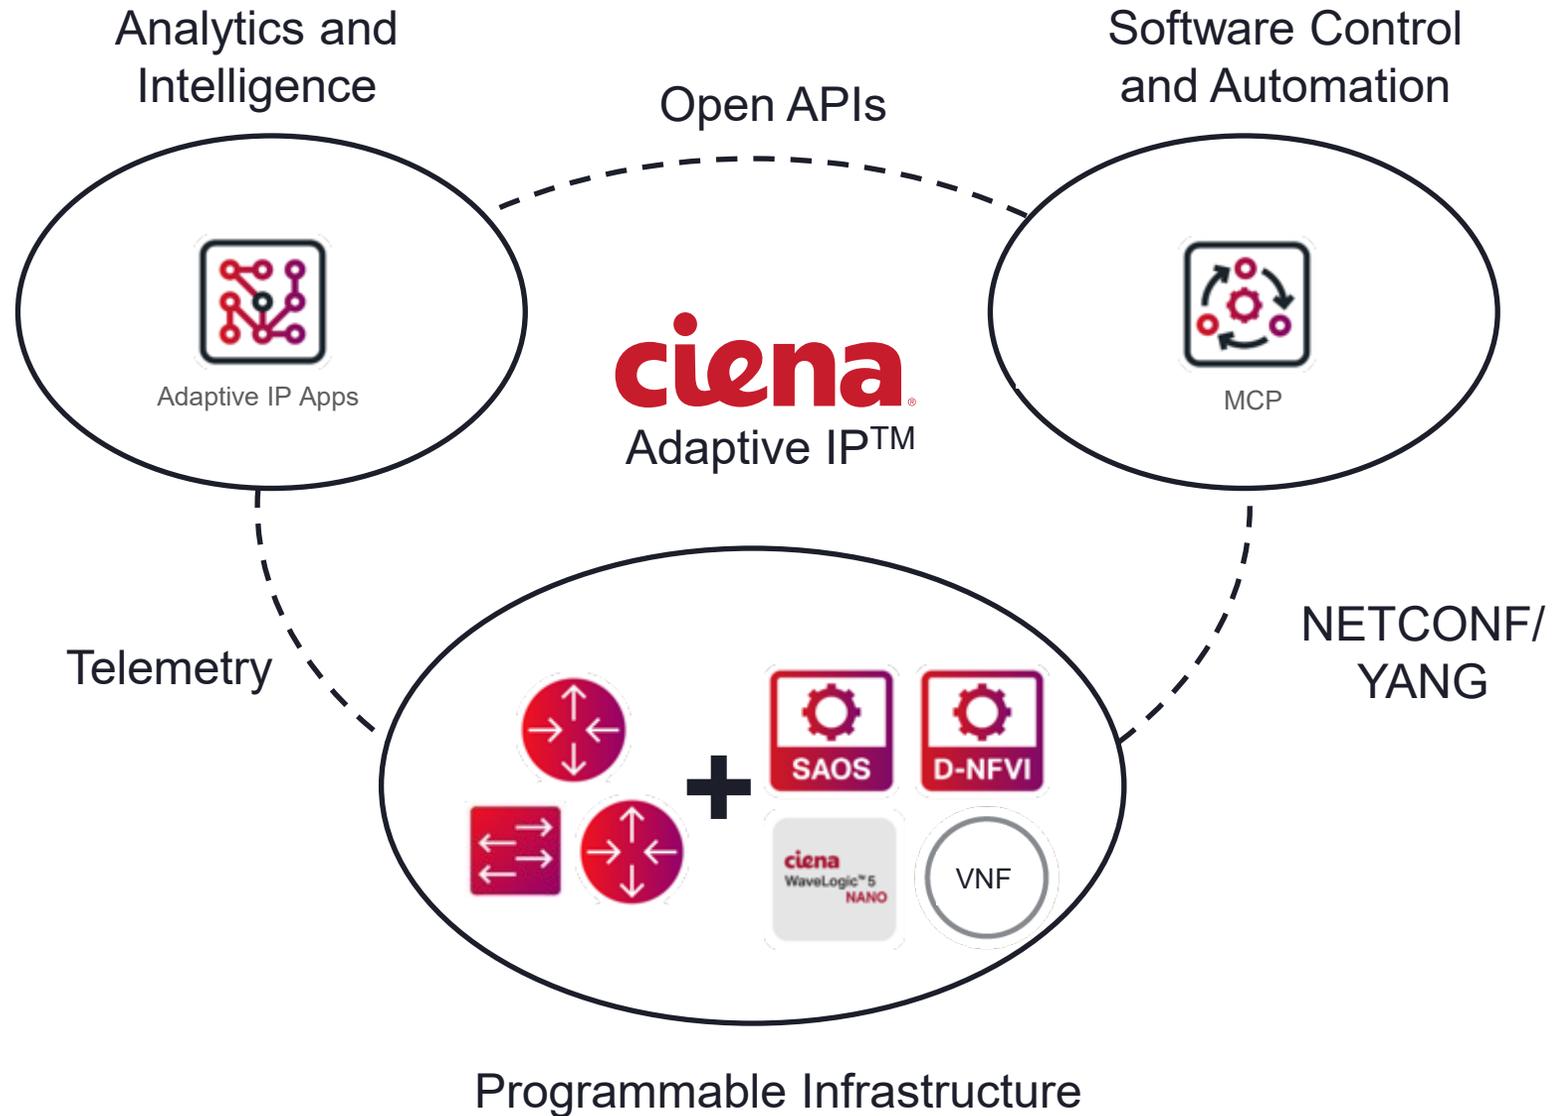

Open hardware platform, enabling open-sourced software innovation

Success metrics → agility, simplicity, and usability

<https://www.ciena.com/insights/adaptive-ip>

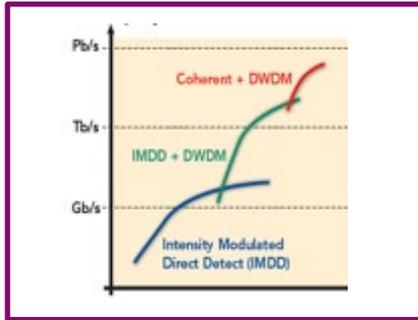

Ciena's Adaptive IP Approach

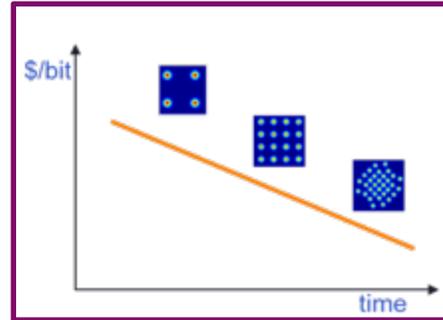

Addressing the need for Massive Scale

Coherent technology is playing an increasingly critical role in solving networking business challenges

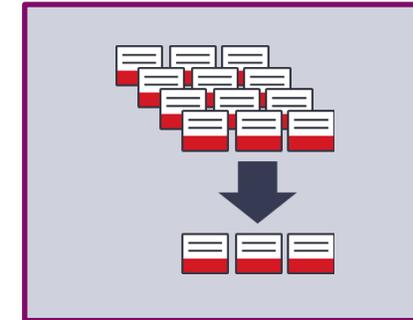

Network capacity

Cost Reduction

Competitiveness

BECOMING PERVASIVE TECHNOLOGY ACROSS APPLICATIONS

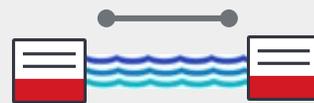

Multi-Haul: Metro and Long Haul

100s to 1000s km

Submarine

10,000km

DCI

10s to 1000s km

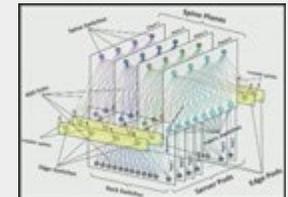

Fiber in Access (Fiber Deep, 5G)

10s km

Intra-DC?

Ciena WaveLogic 5 Nano

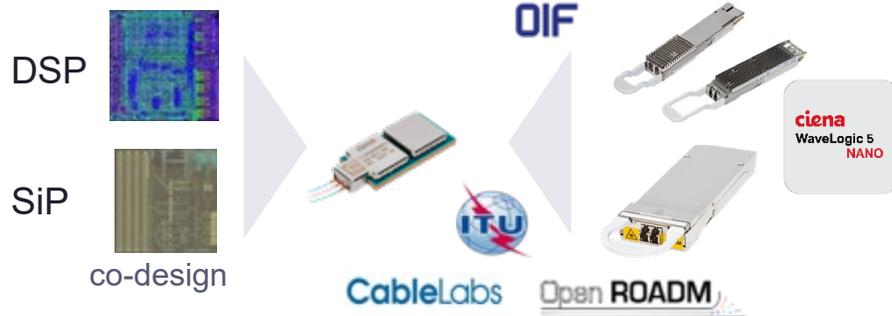

Use Case-Optimized Coherent Solutions - Reducing network complexity and cost while matching your network requirements

Ciena WaveLogic 5 Nano Offering

Lowest power, longest reach, simpler network

Full technology and design ownership

Interop and high-performance pluggables

Unmatched coherent design and networking expertise for cost efficiencies and reliable deployments at scale

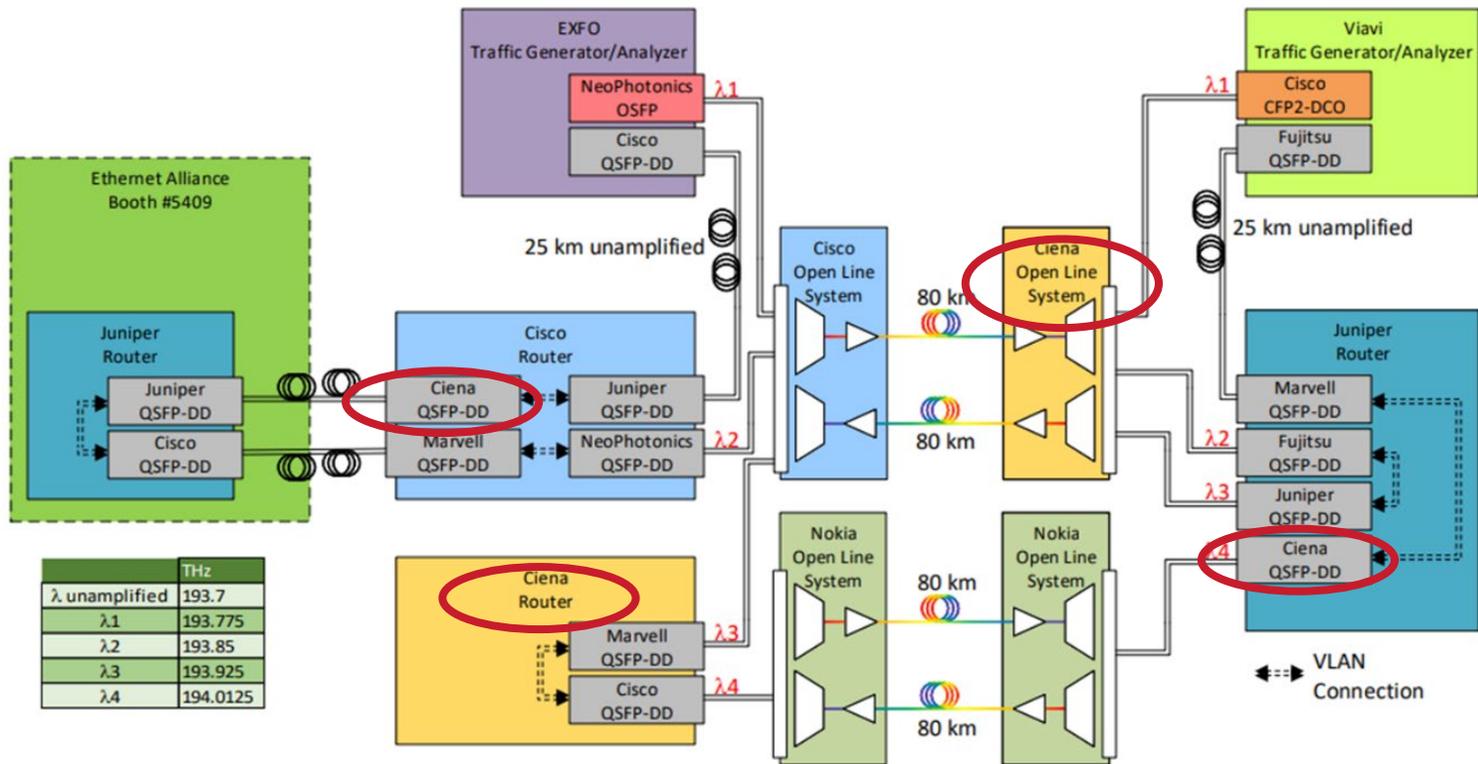

| Transmission Groups | Standards | Line Rates (Gbps) | Symbol Rates (Gbd) |
|---------------------|--------------------|-------------------|--------------------|
| 400ZR/ZR+ | OIF 400ZR | 400G | 60 |
| | MSA 400ZR+ | 400G | 60 |
| + | | | |
| PKT-MAX | Ciena Proprietary | 400G | 70 |
| | | 400G | 65 |
| + | | | |
| OTN-STND | ITU-T / Open ROADM | 400G | 63 |
| + | | | |
| OTN-MAX | Ciena Proprietary | 400G | 70 |

(Lower speeds also supported)

Demo: OIF 400ZR multi-vendor interoperability demo

Ciena successfully demonstrated interoperability!

Ciena participating with:

- WL5n pluggables
- 5166 router
- RLS open line system

WL5n 400ZR QSFP-DD

5166

RLS

MCP Applications

Intelligent network control for automated multi-layer, multi-vendor operations and optimization

Obrigada!
